Time Stands Still

By Fikry Botros

Minimum Bid \$180

Retail Value \$350

Botros is an engineer by education and profession. Since graduating from Columbia University, he has worked in the oil and gas industry in Houston, with a number of overseas assignments throughout his career. Photography has been his passion ever since he was young boy in Egypt. Throughout the years, film gave way to using a digital process and his content emphasis which began with landscape and architecture images gave way to street photography. "I am fascinated by the inexhaustible variety of opportunities everyday life offers me as a photographer," explains Botros. "My approach is to look for these unique and expressive moments where they exist without any need to create or modify them. I use photography to slow life down so I can savor its offerings. This becomes a self fulfilling prophecy; the more you search, the more you find."
